Your employer will make regular superannuation contributions to your account.

You may be able to make regular contributions through payroll deductions from your salary, such as the tax effective salary sacrifice option. Ask your employer for more details.

Choose how your super is invested

Whether you're starting your career, well established or nearing retirement, CustomSuper offers you a range of investment options. You can choose from the AMP MySuper option, Choice options, or a combination of both.

AMP MySuper (default) – we'll do the work for you

This option suits members who want AMP to professionally manage their super for them. If you don't make an investment choice when you join, you'll be placed into the MySuper option.

AMP MySuper uses a lifecycle investment approach. We make it easy for you by investing in an option suitable for your age, then adjusting your investment mix as you grow older.

Choice options – choose for yourself

Multi-sector (Traditional) investment options

These options suit members who want more control and are happy to review their investment choice over time as their risk profile changes.

We've created portfolios with investments spread over various asset classes that are considered appropriate for different risk profiles—from Conservative to Aggressive.

Multi-sector (Specialist) investment options

These options suit members who want more control and are happy to review their investment choice over time, without using a risk profile.

We've created portfolios that invest in multiple asset classes, or you can concentrate on a few selected asset classes.

Single-sector investment options

This approach suits members who are looking for higher involvement in managing their super.

We've given you the flexibility to build a portfolio that matches your own investor profile by investing in single-asset classes, which may include a small allocation to cash.
